SEiNG

What is SEiNG?

SEiNG is a secure Cloud Video Surveillance platform delivering a powerful, smart and easy to use CCTV system.

SEiNG's dashboard allows you to remotely access your camera footage from anywhere.
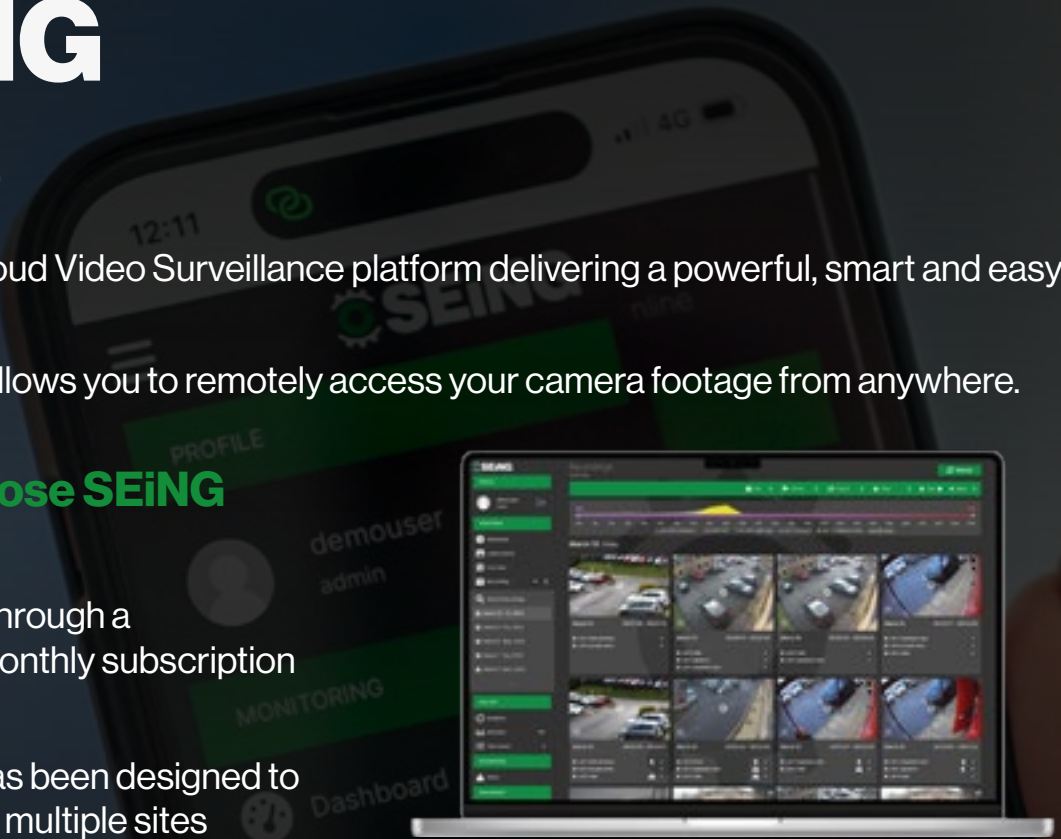

Reasons to choose SEiNG

- **Affordable**
  SEiNG is offered through a comprehensive monthly subscription

- **Easy to use**
  The SEiNG hub has been designed to intuitively manage multiple sites

- **Secure**
  SEiNG features end-to-end data encryption and industry-leading security measures to protect footage

- **Scalable**
  SEiNG is scalable, easily add extra cameras or data storage

SEiNG features

- **Live view**
  Securely access and view cameras across all of your sites using a standard web browser

- **Recorded footage**
  Record footage from your cameras and store it in the cloud

- **Motion alerts**
  Automatically receive notifications of events and incidents

- **Hardware agnostic**
  Use your existing cameras or select a manufacturer of your choice

Benefits of using SEiNG

- **Peace of mind**
  Knowing that your people, property and assets are being monitored

- **Costs**
  Avoid initial large scale capital expenditure. Reduce total cost of ownership through Cloud infrastructure

- **Collaboration**
  Easily share incident data for faster investigation and responses

- **AI based analytics**
  Quickly search and review events and incidents with advanced search features

- **Automatic software updates**
  New software versions are easily deployed in the cloud environment, to ensure your system is always up to date

How does SEiNG work?

SEiNG has been designed to manage multiple sites, intuitively, with video footage stored securely in the Cloud. Access live and recorded images via any device using a standard web browser.

The SEiNG platform has been designed for a variety of commercial environments and offers three deployment options.

Direct IP Camera

- Direct connection for existing IP cameras
- Supports ONVIF / RTSP
- Via VPN / NAT
- Video processed & stored in the cloud

Cloud Camera

- Cloud connected cameras
- With or without buffer storage
- Motion based video sent to the cloud
- Data encrypted in flight
- Video processed & stored in the cloud

Cloud Gateway

- Gateway connection to existing cameras
- With or without buffered storage
- Motion based video sent to the cloud
- Data encrypted in flight
- Supports ONVIF / RTSP
- Video processed & stored in the cloud

How can I get started?

Discover answers to our most frequently asked questions and watch helpful video tutorials. Register for a live system demonstration and request a free 30-day trial to see the benefits and appreciate how SEiNG puts you in command of your data.
